Have You Covered  
All Of Your Coating Concerns?

**bioLime vs. Other Coatings**

excellent  
 good  
 fair  
 poor  
 \* short term

Material Performance	bioLime	Cement-based	Natural Clay	Acrylic-based	Elastomeric	Gypsum/Imperial
Fire resistance						
Water resistance					*	
Bacteria resistance						
Mold resistance						
Insect resistance						
Thermal performance						
Energy efficiency						
Salt tolerance						
UV reflectance						
Indoor temperature stability						
Highest water vapor release						
Adhesion to substrate		*		*	*	
Extreme weather stability		*				
Weathering protection		*		*	*	
Durable				*	*	
Substrate preservation						
Autogenous (self) healing						
No off-gassing						
Clean, healthy indoor air						
Fights for sterility						
Suitability in allergenic environments						
Longevity						
Ecological						
Feeling of comfort						
<b>Overall Performance</b>						

**In comparison to other coating materials - bioLime  
OUTPERFORMS in ALL areas, including COST!**
